

FIRE CURTAIN MOTOR

FIRE CURTAIN MOTOR

Fire curtain motor with hydraulic control

The motor allows speed-controlled raising and lowering of the curtain in case of emergency, with a continuous load capacity of 227 kg up to 499 kg (1,100lbs) with a 30' stroke in the standard version. The weight of the hoses is very important for the correct operation of the motor and the release of the system.

The motor is equipped with a key-operated control station and a control system. Flexible operation on three-phase voltages of 208, 230, 460 and 600 VAC.

Requires a complete fire curtain release line system to operate correctly.
