DIRECT CONTROL TWIST-LOCK

The SD-800/WCT-APR is an 8x channel Hoist Controller for Direct Control chain hoists. It features 8 TL-4-20A connectors that make efficient cable management possible. This controller also has one hot-pocket for pickle hook-up.

The SD-800-WCT-APR comes with automatic phase reverse (APR) as a standard feature. When the main supply is connected, there is no need to worry about switching over to the proper lifting direction. This controller can be used with a SD-100 as a main power distribution capable of driving up to six units.

The Standard configuration comes with:

<div style="background:red;color:white">
