

SD-100

POWER DISTRIBUTION

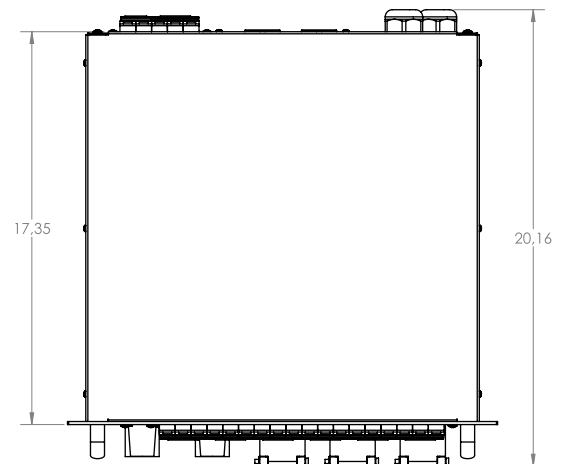

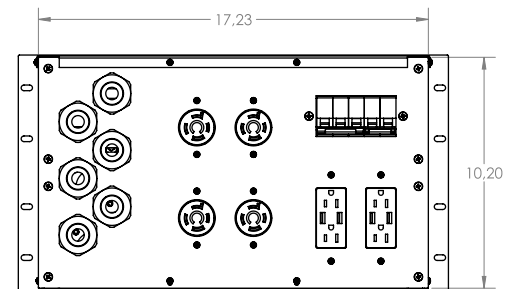

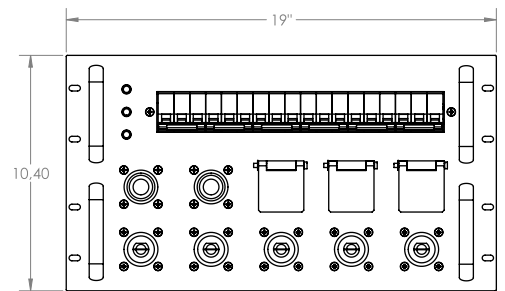

POWER DISTRIBUTION

SD-100

The SD-100 is the power distribution essential to power a rigging system. It features multiple connections, different types and sizes of connectors as well as a Cam-Lok input.

The SD-100 is easy to customize depending on required voltage, connections, etc.

It features 3 pole breakers for the 3 phase 208V outlets, and single pole breakers for the 120V single phase outlets.
